PROFESSIONAL MAINTENANCE MANAGEMENT

Maintenance, made visible.

Your equipment. Your maintenance.
A clearer view of both.

---

01 **Know your equipment.**

One unit. One connected service history.

02 **See what is planned.**

Visits, timing and assigned teams.

03 **Follow the work.**

Findings, records and next actions.

WHAT IS MEPSOL?

Your maintenance, brought together.

MEPSOL is FAAT’s maintenance-management platform. It connects equipment records, service planning and client reporting.

EQUIPMENT

Which unit needs attention?

Identify the unit, its location and its service history.

VISITS

What happens next?

See planned activity and the team assigned to the work.

FOLLOW-UP

What was done?

Keep findings, completed work and next actions in context.

01 / IDENTIFY THE EQUIPMENT

One unit.
A connected history.

Start with the equipment. Keep its identity, location and service information together.

EQUIPMENT RECORD

CHILLER 01

Main building / Plant room

Identity

Manufacturer + model

Location

Property + unit

Service history

Visits, findings and relevant documents

The next visit starts with context.

Illustrative equipment record, simplified for clarity. Not an application screenshot.

02 / PLAN THE VISIT

The right unit. A clear plan.

The Dispatch Center brings visits, scheduling and team allocation into one operational view.

PLANNED VISIT

Chiller 01

Preventive maintenance

WHEN

Monday / 09:00

WHO

Assigned technician

01

Identify the unit

02

Set the visit

03

Assign the team

Illustrative visit. Dates and assignments are examples, not service commitments.

03 / DOCUMENT THE WORK

The visit ends. The record stays.

Keep the finding, the intervention and the next action distinct. That makes follow-up easier to understand.

CHILLER 01 / SERVICE RECORD

01 Finding

What did the technician observe?

02 Work completed

What was checked, serviced or repaired?

03 Next action

What still needs attention?

Simplified service-record structure. Technical procedures and decisions remain with the service team.

04 / FOLLOW YOUR SERVICE

Three questions. A clearer view.

The client portal brings scheduled maintenance, service requests, equipment records and documents into your workspace.

01 **What is planned?**

Upcoming visits and the equipment covered.

02 **What needs attention?**

Service requests and their recorded activity.

03 **Where is the record?**

Equipment history and supporting documents.

Available views and services depend on the configured account and agreed service scope.

THE PEOPLE BEHIND THE PLATFORM

Digital visibility. Engineering responsibility.

MEPSOL gives the work structure. FAAT’s engineers and technicians bring the judgment and expertise to act on it.

The platform

Equipment context.

Visit planning.

Documented activity.

Accessible service history.

The people

Technical assessment.

On-site intervention.

Clear recommendations.

Client communication.

A stronger basis for after-sales support.

Records can support technical escalation and warranty review.

Warranty eligibility remains subject to manufacturer requirements and the agreed scope.

MEPSOL

Know your equipment. Follow your service.

Organized service. Documented work.
A clearer equipment history.

See MEPSOL in action.

Arrange a guided demonstration with FAAT.
